

Cybercrime Seminar in Millennials in the Digital Age

The Faculty of Law, University of Medan Area (UMA) held a seminar with the theme "Cyber Crime in the Millennial Generation in the Digital Age" on Thursday, October 31, 2019 at the Convention Hall of the UMA Campus Library Building.

The seminar was attended and opened directly by the Rector of the Medan Area University Prof. Dr. Dadan Ramdan M.Eng, M.Sc, Dean of the Faculty of Law Dr. Rizkan Zulyadi, SH, MH, Deputy Dean for Student Affairs Ridho Mubarak SH MH, Head of Criminal Affairs Wessy Trisna SH.MH, UMA Civil Servants Head, Zaini Munawir Lubis SH.M.Hum, Chairperson of the Criminal Student Association Johannes Christoper, Lecturer in the Faculty of Law, Student Faculty of Law and Students from SMK 11 Medan, SMA Negeri 1 Medan etc.

The seminar featured speakers Drs Saut Aritonang SH.M.Hum, staff of the North Sumatra Department of Education (North Sumatra) High School, and Iptu Victor Richard Pasaribu from the Siber Sub Directorate of the North Sumatra Regional Police.

Before the event was opened by the Chancellor of UMA, the remarks from the Dean of the Faculty of Law in his speech said that many people became victims of cyber crime due to lack of socialization about the modes of crime that developed in cyberspace. We hope that this seminar can become a provision for students and students so that they do not become victims of cyber crime. Here we also remind students that your fingers are your tiger, "said the UMA Dean of Law.

Furthermore, the UMA Rector in his remarks as well as opening the seminar said to Millennials Students and Students must be smart in using social media (social media). Because almost every day there are cases of violations of the Law (UU) Information and Electronic Transactions (ITE) that befall the citizens of Indonesia, we do not want millennial generations such as students and students entangled in violations of ITE because of their ignorance. Therefore, millennials must be careful if they receive news disseminated on social media. Millennials must know which news is appropriate or not worth sharing, "the UMA Rector said.

Meanwhile, Saut Aritonang in his presentation said, if properly used social media and digital technology will be a blessing for the Indonesian people. Among these can be to strengthen friendship and unite citizens from Sabang to Marauke. For this reason, I remind my children, students, in social media, do not let negative content in it. Fill with useful things. Share only the information that we have filtered out the truth and its benefits. Do not let our thumbs faster than thoughts when dealing with social media, "said North Sumatra Disdik Staff.

While Iptu Victor Richard Pasaribu revealed, North Sumatra Regional Police have activated the cyber crime team (cyber crime) to monitor cyberspace activities. The main targets to be prioritized are those that contain hate speech, ethnicity, religion, race and intergroup (SARA). In addition to monitoring the community, the cyber team also oversees every development in cyberspace. What is disseminated or developed in cyberspace, the North Sumatra Regional Police's Directorate of Cyber Sub-Directorate Team will find out, "said Victor.
